CHENHAO DING

Ph.D. Student in Creative Informatics | The University of Tokyo | Tokyo, Japan
Google Scholar · Vision-Language Models / Embodied AI / Test-Time Adaptation

RESEARCH INTERESTS

Vision-language models, vision-and-language navigation, online test-time adaptation, parameter-efficient fine-tuning, and continual learning.

EDUCATION

The University of Tokyo · Ph.D., Creative Informatics | 2026–Present · Advisor: Prof. Hideki Nakayama

Xi'an Jiaotong University · M.S., Computer Science and Technology | 2023–2026 · Advisor: Prof. Yihong Gong

Xidian University · B.S., Artificial Intelligence | 2019–2023 · Top 5% in class

HONORS & RESEARCH FUNDING

SPRING GX Doctoral Research Support Program | The University of Tokyo | Oct. 2026–Present
Selected doctoral research support recipient under the JST SPRING framework. [program]

RESEARCH EXPERIENCE

Nakayama Laboratory, The University of Tokyo | Graduate Researcher | 2026–Present
Online adaptation for vision-and-language navigation; feedback-driven learning and grounded decision-making.

Xi'an Jiaotong University | Graduate Researcher | 2023–2026
Vision-language model generalization, parameter-efficient tuning, geometric and training-free adaptation.

FIRST-AUTHOR PEER-REVIEWED PUBLICATIONS

Sustaining Cross-Modal Dependency for Generalizable Vision-Language Model Tuning [paper]
Chenhao Ding, Jizhou Han, SongLin Dong, Xinyuan Gao, Qiang Wang, Lixin Xiu, Wei Ke, Yihong Gong, Hideki Nakayama. *Findings of EMNLP, 2026.*

Reorienting the Frozen Space: Training-Free Test-Time Adaptation by Geometric Transformation [paper]
Chenhao Ding, Jizhou Han, SongLin Dong, Xiang Song, Xinyuan Gao, Qiang Wang, Yuhang He, Zhiheng Ma, Yihong Gong. *IEEE TCSVT, 2026.*

SuLoRA: Subspace Low-Rank Adaptation for Parameter-Efficient Fine-Tuning [paper]
Chenhao Ding, Jiangyang Li, SongLin Dong, Xinyuan Gao, Yuhang He, Yihong Gong. *Findings of ACL, 2025.*

SELECTED CO-AUTHORED PUBLICATIONS

Is Parameter Isolation Better for Prompt-Based Continual Learning? [paper] · *CVPR 2026* · Second author

Learning Like Humans: Analogical Concept Learning for Generalized Category Discovery · *CVPR 2026* · Second author

Shared & Domain Self-Adaptive Experts with Frequency-Aware Discrimination for Continual Test-Time Adaptation · *AAAI 2026* · Second author

ADDITIONAL FIRST-AUTHOR PREPRINTS

Class-Independent Increment: An Efficient Approach for Multi-label Class-Incremental Learning [paper] · *arXiv, 2025*

LOBG: Less Overfitting for Better Generalization in Vision-Language Model [paper] · *arXiv, 2024*

RESEARCH EXPERTISE

Methods: LoRA and PEFT, training-free and online TTA, continual learning, policy adaptation.
